CAREER SUMMARY

Aspiring Full Stack Java Developer with a strong backend development focus and hands-on experience building secure, scalable applications using Java, Spring Boot, Spring Security, JWT, Hibernate, and MySQL. Experienced in developing REST APIs, authentication systems, database-driven applications, and full-stack projects using React. Passionate about software engineering and building real-world applications.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL, C

Frontend Technologies: React, HTML5, CSS3

Backend Technologies: Spring Boot, Spring Security, Hibernate, JDBC, REST APIs

Database: MySQL

Tools & Platforms: Git, GitHub, Docker, Postman, IntelliJ IDEA, VS Code

Build Tools & Security: Maven, JWT Authentication

EDUCATION

Andhra University College of Engineering
Bachelor of Technology (Computer Science and Engineering)
Aug 2023 – Jul 2027

Tirumala Junior College
Intermediate (MPC)
Jun 2021 – May 2023

INTERNSHIP EXPERIENCE

Company: Elevate Labs

Position: Java Developer Intern

Aug 2025 – Sep 2025

Responsibilities:

- Developed backend modules using Java and Spring Boot.
- Worked with REST APIs and MySQL databases.
- Implemented JWT-based authentication and authorization.
- Followed layered architecture and clean coding principles.

PROJECTS

NOSTOS – Lost & Found Management System

 Backend  Frontend

Java — Spring Boot — Spring Security — JWT — React — MySQL

- Developed a full-stack Lost & Found platform enabling users to report, track, and recover lost belongings.
- Implemented Email OTP verification, JWT authentication, and role-based access control using Spring Security.
- Designed claim-management workflows with ownership verification, duplicate claim prevention, and fraud detection.
- Built automatic item matching, pagination, filtering, email notifications, and admin moderation features.
- Developed responsive frontend interfaces using React and integrated them with REST APIs.

Hospital Management System

 GitHub

Java — Spring Boot — Spring Security — JWT — MySQL

- Developed backend services for managing patients, doctors, appointments, departments, and hospital staff.
- Implemented secure authentication and role-based authorization for Admin, Doctor, Nurse, Receptionist, and Staff roles.
- Designed RESTful APIs and entity relationships using Spring Data JPA and Hibernate.

Online Bookstore Management System

 GitHub

Java — Spring Boot — Spring Security — JWT — MySQL

- Built backend services for managing books, authors, inventory, users, carts, and orders.
- Implemented JWT authentication and role-based access control using Spring Security.
- Designed REST APIs and database relationships using Spring Data JPA and Hibernate.

Quiz App

 GitHub

Java — Spring Boot — Spring Security — JWT — MySQL

- Developed backend APIs for quiz creation, question management, quiz participation, and score calculation.
- Implemented JWT-based authentication and role-based access control for secure access.
- Designed relational database structures using Spring Data JPA.

Notes App

 GitHub

Java — Spring Boot — Spring Security — JWT — MySQL

- Developed a secure CRUD Notes application backend using Spring Boot.
- Implemented JWT authentication, authorization, and MySQL persistence using Spring Data JPA.
- Applied validation and exception handling to improve API reliability and security.
