 Portfolio

Visakhapatnam, Andhra Pradesh

CAREER SUMMARY

Full Stack Java Developer with hands-on experience building secure and scalable web applications using Java, Spring Boot, Spring Security, Hibernate, React, and MySQL. Skilled in developing RESTful APIs, implementing JWT-based authentication and authorization, designing relational databases, and building end-to-end full-stack applications. Passionate about backend engineering, scalable system design, clean code, and developing production-ready software.

TECHNICAL SKILLS

- Programming Languages:** Java, JavaScript, SQL, C
- Frameworks:** Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC
- Frontend:** React, HTML5, CSS3
- Database:** MySQL
- Tools:** Git, GitHub, Docker, Maven, Postman, IntelliJ IDEA, VS Code
- Core Concepts:** Object-Oriented Programming (OOP), Collections, Exception Handling, Multithreading, MVC Architecture, Layered Architecture
- Other:** REST APIs, JWT Authentication

EDUCATION

Andhra University College of Engineering Bachelor of Technology (Computer Science and Engineering) CGPA: 8.6/10	Aug 2023 – Jul 2027
Tirumala Junior College Intermediate (MPC)	Jun 2021 – May 2023

INTERNSHIP EXPERIENCE

Elevate Labs Java Developer Intern	Aug 2025 – Sep 2025
- Developed backend modules using Java, Spring Boot, and MySQL following layered architecture. - Designed and implemented RESTful APIs for CRUD operations and seamless database integration. - Integrated Spring Security with JWT-based authentication and role-based authorization. - Used Spring Data JPA and Hibernate for efficient database operations. - Tested and validated REST APIs using Postman and followed clean coding best practices.	

PROJECTS

NOSTOS – Lost & Found Management System Backend Repo — Frontend Repo *Java — Spring Boot — Spring Security — JWT — React — MySQL*

- Developed a full-stack Lost & Found platform enabling users to report, search, claim, and recover lost belongings.
- Implemented Email OTP verification, JWT authentication, and role-based access control using Spring Security.
- Built intelligent claim verification with duplicate claim prevention and ownership validation.
- Designed RESTful APIs supporting pagination, filtering, automatic item matching, email notifications, and admin moderation.
- Developed responsive React interfaces and integrated them with secure RESTful APIs.

Hospital Management System GitHub *Java — Spring Boot — Spring Security — JWT — MySQL*

- Developed RESTful APIs for managing patients, doctors, appointments, departments, and hospital staff.
- Implemented JWT authentication and role-based authorization for Admin, Doctor, Nurse, Receptionist, and Staff.
- Designed relational database models using Spring Data JPA and Hibernate.
- Secured application endpoints using Spring Security and layered architecture.

Online Bookstore Management System GitHub *Java — Spring Boot — Spring Security — JWT — MySQL*

- Built backend services for managing books, authors, inventory, users, carts, and orders.
- Implemented JWT authentication and role-based access control using Spring Security.
- Designed REST APIs and database relationships using Spring Data JPA and Hibernate.
